MOSI Site Master Plan (Image: Alfonso Architects)

The Museum of Science & Industry (MOSI, Tampa) plans to build the Nation's first STEAM Zone, a Science, Technology, Education, Arts & Mathematics development transforming their 73-acre site.

White Oak prepared MOSI's *STEAM Zone Master Plan* which coordinated the work of many staff authors and specialized consultants for the fifteen major projects in MOSI's twelve-year vision.

White Oak's synthesis of the site's many tenants and offerings is that its stepping-stone components (see below) will demonstrate the sequence of Florida's STEAM Engine of Innovation, from toddler to tycoon.

The Steam Zone concept and the scale of the plan are visionary, and MOSI has assembled a talented and expert team. White Oak is proud to have integrated and synthesized their work into a consistent and creditable *Master Plan*.

MOSI's STEAM Engine of Innovation

Client: Museum of Science & Industry (MOSI)

Covers: 2014 - 2025

Architect: Alfonso Architects

Capital Budget: \$116M by MOSI; \$94M by others

White Oak's Role: *STEAM Zone Master Plan*
